Full Stack Developer

Description

Full Stack Developer proficient in both front-end and back-end technologies, capable of designing, developing, and deploying scalable web applications. Skilled in languages such as JavaScript, Python, and frameworks like React and Django. Experienced in database management, API integration, and responsive UI/UX design.

Responsibilities

- Develop high-quality software solutions that are scalable, secure, and efficient.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Write clean, maintainable code following best practices and coding standards.
- Troubleshoot, debug, and resolve issues in existing software applications.
- Stay up-to-date with emerging technologies and trends in the industry.
- Participate in code reviews and provide constructive feedback to team members.
- Continuously improve software development processes and practices.

Qualifications

Bachelor's degree in computer engineering or related degree and/or equivalent experience.
