Java Developer

Description
As a Java Developer at TEKhops LLC, you will be responsible for designing, prototyping, and developing scalable enterprise application modules. Your expertise in Java/J2EE and web technologies will be vital in meeting functional requirements, troubleshooting production issues, and creating RESTful APIs using Spring Boot with Spring MVC.

Responsibilities

- Design, prototype and develop scalable complex enterprise application modules applying object-oriented analysis concept.

- Use the Java/J2EE and web technology stacks to meet functional requirements.

- Display proficiency with the modules and tools used in projects such as Java, Java Script, JSP, AJAX, HTML, CSS.

- Troubleshoot production issues and root cause analysis.

- Create micro service to provide RESTful API utilizing Spring Boot with Spring MVC.

Qualifications

- Master's degree in Computer Science, Engineering (any), Technology, or a related field.

- Minimum of 1 year of hands-on experience.
